

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-15 (Canceled).

Claim 16 (Currently Amended): An information storage medium configured to have data recorded thereon and data reproduced therefrom by at least one of a recording and/or reproducing apparatus, said data including management information including still picture VOB group information, and still picture information, the information storage medium comprising:

a first recording area configured to record audio information of an additional audio group and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

said still picture additional audio file information including start address information of the additional audio group,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state, and

video part size information indicating a size of a video part of the corresponding still picture video object, and

~~said still picture additional audio file information including start address information of the additional audio group,~~

wherein the recording and/or reproducing apparatus accesses the still picture VOB group information of the second recording area to reproduce the still picture information.

Claim 17 (Currently Amended): An information recording method for recording still picture information on an information storage medium, the information storage medium including,

a first recording area configured to record audio information of an additional audio group and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

said still picture additional audio file information including start address information of the additional audio group,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state, and

video part size information indicating a size of a video part of the corresponding still picture video object, and

~~said still picture additional audio file information including start address information of the additional audio group,~~

the information recording method comprising:

recording the still picture information in the first recording area; and

recording the still picture VOB group information in the second recording area.

Claim 18 (Currently Amended): An information reproducing method for reproducing still picture information recorded on an information storage medium, the information storage medium including,

a first recording area configured to record audio information of an additional audio group and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

said still picture additional audio file information including start address information of the additional audio group,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state, and

video part size information indicating a size of a video part of the corresponding still picture video object, ~~and~~

~~said still picture additional audio file information including start address information of the additional audio group,~~

the information reproducing method comprising:

reproducing the still picture information recorded in the first recording area based on the still picture VOB group information recorded in the second recording area.

Claim 19 (Currently Amended): An information reproducing apparatus for reproducing still picture information recorded on an information storage medium, the information storage medium including,

a first recording area configured to record audio information of an additional audio group and the still picture information, the still picture information including a still picture video object group having at least one still picture video object; and

a second recording area configured to record still picture additional audio file information and the still picture VOB group information,

said still picture additional audio file information including start address information of the additional audio group,

the still picture VOB group information managing a corresponding still picture video object group and including,

still picture VOB entry type information including a temporary erase flag indicating whether the corresponding still picture video object is in a temporarily erased state, and

video part size information indicating a size of a video part of the corresponding still picture video object, and

~~said still picture additional audio file information including start address information of the additional audio group,~~

the information reproducing apparatus comprising:

a reproducer configured to reproduce the still picture information in the first recording area based on the still picture VOB group information recorded in the second recording area.
